Management System

Manage your workflow from office, home or anywhere, no more boundaries.

A 360° ERP solution to your Business or Organization to fulfil your requirement, which comes with device compatibility.

ERP Solutions

ERP TYPES

- Retail Management ERP
- GST Billing ERP
- HR Management ERP
- Import & Export Business ERP

KEY FEATURE OF ERP

- Businesses have various units and they use different functions, ERP provides a shared database that makes the whole management work easier and smoother. For example, the employees from different departments such as accounts and sales will have the access of the same
- reliable information according to their particular requirements.
- After ERP entered into the business world, companies are no more bound to work in silos. It is an integrated and intuitive platform that analyzes, monitors as well as conducts the majority tasks driven by data. The single database allows ERP to collect and store data from various departments, ensuring flawless communication within the company or organization.

Why us?

At first, we are highly professional and strongly concerned about our client's satisfaction. Secondly, our expert team is well equipped with all the requisite knowledge so they can create the best ERP software compatible to your requirements.

ERP Solution

To simply put, ERP or enterprise resource planning helps to integrate various processes into one system that are essential to run your company or institution. Through modern technologies including machine learning and Artificial Intelligence it provides visibility as well as efficiency related to each aspect of your business.

Is ERP beneficial?

ERP can be considered as an influential and flexible tool for your business and no business regardless of its scale can deny the importance as well as the impact of ERP in today's competitive world. ERP gives you the chance to align various individual departments, improving workflows.

- Real time information improves business insight
- Streamline processes lowers operational costs
- Enhanced user collaboration
- Well defined processes and functions of business improves your efficiency
- Consistency in infrastructure
- Adoption rate of users increase
- Integrated data and control on
- finance reduces risk factors

The above mentioned bullet points are some of the important and notable benefits that you may get if you have 'enterprise resource planning' for your business.

Automation is a time saver

Various tedious processes that may include order entry, accounting, payroll, invoicing and so on can be automated through ERP that allows the staffs to give their attention to other essential assignments, resulting more useful workdays. Automation means transfer of data from one part to another part of the system without the risk of making any error. Do not forget that your staffs are human beings and it is quite possible that they make mistakes while repeating a same task again and again. Through automating all the processes you can reduce the chance of human error.

- Read all of our services carefully before you proceed further.

Service Terms

- All estimates/quotes are based on our understanding of your requirements and as per given time-frame. Any changes to the functionality including micro-improvements, may incur additional costs accordingly. Please ensure and clarify our understanding in a face to face meeting.
- By accepting a quote, you agree to and accept the terms and conditions of xeuix. Acceptance can be verbal, by email, payment of Initiation, signing a quote.
- Clients to ensure that we have included all requirements in the quotes/proposals/estimates and that we fully understand their requirements. Clients must provide us with clear guidelines along with the flow or specific details they may require. When such details are not provided, we will proceed with our understanding of the requirements and quote accordingly. At a later stage, if a discrepancy arises, it may lead to additional costs to accommodate the changes. Thus, it is essential that you clarify every aspect of your website development and ensure that you have been quoted on the right requirements.
- Any complexity related to specific tasks, must be advised in advance and included in the proposal for costing purposes. We operate in good faith and rely on our clients to disclose the full picture at the time of quotation. Any discrepancy arising due to unclear requirements will not be borne by xeuix.
- There are limited man-hours allocated to each task including Project Management and Digital Strategist/Business Analyst. Minor changes may be included within the allocated hours. This will be analysed on a case-by-case basis.

WEB SERVICE

TERMS & CONDITIONS

- xeuix will make every effort to complete the project/changes in the given timeframe. Reasonable delays are accepted if functionalities are redefined or modified.
- Any delays at client's end, may delay the project and proposed timeframes and may incur additional costs.
- Any bugs (programming errors) reported during or just after the development does not attract additional charges.
- Any re-work on an already completed task will attract additional charges. Any changes in the design after the design approval will incur additional charges.
- Any modifications requested during the development or after the Go-Live approval will incur additional charges. All additional work, over and above the estimates is charged separately. Under no circumstances will xeuix be liable for any delays caused by change in the project brief.
